Suggestions for MVP and further development

- Do not need friending in data model
- Remove pop-up notifications, use labels instead.
- Tell users about 3 monitors needed, include a flow diagram for checkoffs
- Testing: separate database for testing/ separate collections → can clear every time
- Add more comments on methods
- Move more code away from controllers to models
- UI critique:
  - Consolidate some pages,
  - Invite friends should not be a page of its own
