6.170 Final Project - "Ibetcha"
Thursday, November 20, 2014
Team members: Zulsar Batmunkh, Saadiyah Husnoo
Jonathan Lim, Dana Mukusheva

Progress report

1. Significantly refactored and modularized code: moved code from controllers to methods, shortened functions and methods, removed duplicate code and reduced "calback hell" appearance.
2. Added testing suites for monitor, friend and payment request APIs.
3. Added more validations and edge cases handling (while creating bets, friend requests).
4. Added additional features in the client side code : user search, viewing home profile of other users, friending form another user's profile.
5. Polished UI and made it more reactive.
6. Removed Venmo related code.
